## SUMMER GROOMIN'

### Top Five

You'll probably hate hearing this guys, but with the warmer days ahead, you might need to consider some grooming before you shed the layers. If you're after a little guidance, the team at Guys Grooming has put together its Top Five look-good summer tips. Don't be discouraged though, it's not all plucking and waxing.

- 1. Clean up the t-shirt line** You might not notice the winter forest growing up your neck, but once you don that new designer tee, everyone will. Start your summer preparations with a neck wax.
- 2. Shape up the digits** Having spent all winter hidden in their shoes, your toes probably resemble one of the extras from *Alien*. Get them tidied up with a Feet Detailing treatment before you slip on the thongs.
- 3. Save your ears** Wearing a hat doesn't always protect your ears from the sun, so this summer, make sure you apply long-lasting 30+ block to all parts of your face.
- 4. Hat hair, high hair** When you take the cap off, remember to give your hair some body. Try American Crew's new Foaming Cream, a light and effective, non-goo hair product.
- 5. Avoid social embarrassments** Trim any protruding nose and ear hair before you step out of a long winter's hiding.
